- Percentage : 90%

PROJECT

EcoExpense

The expense splitting application helps users split their shared expenses with other users either equally or unequally and make payments. Users can log in, create groups, add friends, and split expenses. It also provides an expense preview with a graph to track users' expenses.
https://github.com/Justinjolly/eco

ESELL

The online bidding site provides detailed information about the products up for bid, accompanied by a dedicated space to showcase the unique talents of special individuals. It also offers insights into offline bidding events
https://github.com/Esell-bid/Esell

Student Management System

It provides information about student details, including their fees, scholarships, grades, and subjects. Each student have a separate login.
https://github.com/Justinjolly/DBMS_Project
